OMNIKEY® 5422 Dual Interface Reader

The OMNIKEY® 5422 represents the ultimate combination of contact and contactless technology in a single device. The solution features a dual interface, PC-linked reader that reads / writes to both a 13.56 MHz contactless smart card and virtually any contact smart card to support environments where both contact and contactless smart card technologies are required. Compliant with ISO14443 A/B, ISO 7816 standards, this reader is compatible with virtually any contactless smart card, operating system and a variety of applications.

Using contactless smart card technology the reader provides users with the convenience, speed and security for applications such as user authentication to PCs, software, cloud-based applications, networks and web sites. The reader supports leading high frequency card technologies on the market including iCLASS*, MIFARE* and MIFARE DESFire*.

The OK5422 eliminates the requirement for driver installation and is suitable to be used with standard PC or workstations, as well as with thin- and zero-clients.

The reader is integrated and tested with HID Global's ActivID* ActivClient and ActivID* Applets.

DUAL INTERFACE CONTACT AND CONTACTLESS SMART CARD READER

- Versatile Ideal for enduser environments using both contact and contactless smart card technology and migration scenarios.
- Leverages existing employee badge – Expands the usage of existing physical access cards to computer logon, as well as network and cloud access.
- Easy to install Eliminates the need to install drivers; uses native supported CCID drivers within the operating system.
- Increased security and improved user experience – Reads and retrieves highly secure one-time passwords (OTP) from Seos® cards.
